

Mar 20, 2020

12:00:42 From Lorretta Benning to All panelists : LORRETTA IS HERE

12:00:44 From Shailja Sharma to All panelists : hi

12:01:02 From Melanie Corrigan to All panelists : Hi!

12:01:04 From Anne Sauer to All panelists : Hi from Denmark :)

12:01:06 From Manon Gauthier to All panelists : Hi!

12:01:07 From Naomi Charron to All panelists : Hi from Naomi in Montreal

12:01:08 From Julia Dawson to All panelists : hi from Julia

12:01:11 From Joris-Jan Bos to All panelists : ::hi sue

12:01:13 From Lillie Turner to All panelists : HI FROM KAMLOOPS!

12:01:14 From BONNIE McCormick to All panelists : Hi Sue!

12:01:14 From Karen Eberhardt to All panelists : hello

12:01:15 From Karen Kurtzrock to All panelists : Karen in Ottawa

12:01:23 From Don Draper to All panelists : hello from st. louis

12:01:23 From Kevin Hutchinson to All panelists : Thanks for doing this.

12:01:26 From Tresa Killion to All panelists : Hey to all

12:01:26 From Patty Takacs to All panelists : Hi

12:01:27 From Sabdy Robinson to All panelists : hi from sandy

12:01:31 From Manon Gauthier to All panelists : can you see us?

12:01:32 From Judy Andrews to All panelists : Hello from Butte

12:01:32 From Donna Rutten to All panelists : hi Sue so glad to join you

12:01:32 From Joris-Jan Bos to All panelists : ::joris

12:01:34 From Tove Jensen Ceramics to All panelists : Denmark

12:01:38 From Matthew Little : Howdy!

12:01:42 From Kathleen Scott to All panelists : Hello

12:01:52 From Trish Lansdell-Denholm to All panelists : Hi Trish here from Alberta

12:02:02 From Carol Delledera to All panelists : hi- Carol from Virginia!

12:02:04 From cori sandler to All panelists : hi all - Cori Sandler Pottery - from Vancouver island BC

12:02:05 From Terri Roy to All panelists : Hi from Terri in Ontario canada

12:02:07 From Marcie Greer to All panelists : Hi from California!

12:02:13 From Julie- Jellybean Ceramics to All panelists : Hi Sue! My 12 year old is teaching me how to use this App!

12:02:22 From cori sandler to All panelists : if this is a basic count - i think it is 40 minutes and up to 100 people

12:02:26 From Sofie Goethals to All panelists : Hi guys!

12:02:37 From Sofie Goethals to All panelists : Can we see the attendees names?

12:02:38 From cori sandler to All panelists : thanks for hosting

12:03:04 From Kay Smith to All panelists : hello from Kay

12:04:01 From Joan Roper to All panelists : hi Sue love this!

12:04:16 From Caren Willms to All panelists : hi Sue Caren here. first time with this!

12:04:18 From Julia Dawson to All panelists : I prefer to just watch

12:04:19 From Naomi Charron to All panelists : learning curve is ok!

12:04:23 From Sofie Goethals to All panelists : Yes

12:04:25 From Patty Takacs : yes

12:04:29 From Deb D to All panelists : yes

12:04:32 From Heather Browning to All panelists : yes

12:04:36 From Lillie Turner to All panelists : I think you have to scroll over the bottom of the screen

12:04:36 From Patty Takacs : the center bottom of the window

12:04:43 From Manon Gauthier to All panelists : yep

12:04:44 From Duffy Baum to All panelists : Yes bottom of screen

12:04:59 From cori sandler to All panelists : yes. if you put your cursor on the screen where your image is, you can see the hand wagging feature

12:05:09 From Matthew Little : Do we have to be on video if we want to ask a question?

12:05:41 From Joris-Jan Bos to All panelists : ::i have an unstable connection so better no video...

12:05:53 From Deb Reilly to All panelists : hello everyone from deb Reilly, ontario

12:05:59 From Kevin Hutchinson to All panelists : Sue---Run your curser over video. it will pop up from bottom

12:06:29 From cori sandler to All panelists : how do you get to talk?

12:07:36 From cori sandler to All panelists : hoops can you unmute me again - i clicked the wrong button - can't find the mute button now

12:07:36 From BONNIE McCormick to All panelists : super

12:07:47 From Lorretta Benning : can we just ask questions on this side panel?

12:08:03 From cori sandler to All panelists : i found the mute sorry

12:08:04 From Leslie Tuchek to All panelists : I don't see a mute button at the bottom

12:08:21 From Melanie Corrigan to All panelists : There's no option to turn on video that I can see. (I can use video in other Zoom meetings, so I think it's a setting on your end or how you set up the meeting.)

12:08:46 From Patricia Esperanza Lopez : Hola! Hi from Puerto Rico :)

12:08:53 From Caren Willms to All panelists : i can see Sue, but no one else. I have a laptop

12:08:54 From Lorretta Benning : in audio settigns there is a share screen option

12:08:57 From Patty Takacs : Desktops do not have the ability to add video

12:09:01 From Deb D to All panelists : same here. I've been in these meetings on iPad before and I have had the option for both

12:09:05 From Patty Takacs : It is because it is a webinar

12:09:13 From Judy Andrews to All panelists : I am on a desktop and I don't see a video option

12:09:24 From Deb D to All panelists : I do not have the option this time

12:09:38 From Patty Takacs : We can see Duffy noq

12:10:01 From Joris-Jan Bos to All panelists : ::hi duffy..

12:10:46 From Karen Kurtzrock to All panelists : Let's just get on with it

12:11:24 From Isabelle Roy : Hello from Montréal!

12:12:39 From Yvan Lessard to All panelists : mute your mike if you don't talk...

12:12:42 From cori sandler to All panelists : nYy i cn GWT ON THE SCREEN TOO - THIS IS Cori SANDLER POTTERY

12:13:20 From cori sandler to All panelists : not sure hot get on screen with the others

12:13:43 From Joris-Jan Bos to All panelists : ::can you add me too...

12:13:58 From cori sandler to All panelists : not sure how to get on screen. sorry

12:14:21 From Lorretta Benning : can we access the answers to questions later?

12:15:57 From Julie- Jellybean Ceramics to All panelists : Add me please!

12:16:03 From John Dennis to All panelists : ok from Colombia

12:17:58 From Caren Willms to All panelists : do we ask a question here or on Q&A

12:18:05 From Heather Browning to All panelists : i dont have the mute button , just audio settings

12:18:14 From cori sandler to All panelists : another way is to click the top right of your video window, and click the 3 buttons and you can mute/unmute there and start video, if you are not showing your face yet

12:18:37 From Sofie Goethals to All panelists : That's because you are not added (yet?) as a panelist by Sue.

12:18:43 From cori sandler to All panelists : you may have to reset your cursor over the screen to bring up the menu at the bottom of each screen

12:19:17 From Marsha Carter : I don't have a mute button either

12:19:19 From cori sandler to All panelists : the mute button is also in the three dots on your individual face screen (top right corner of that little box screen

12:20:19 From cori sandler to All panelists : thanks or the connections sue

12:21:25 From cori sandler to All panelists : i can do my best to type some of the answers out in the chat window for folks to copy and paste the answers in their word document our notes or...

12:21:33 From Matthew Little to All panelists : its say you have me muted so I can't unmute

12:22:01 From cori sandler to All panelists : goops maybe not

12:22:53 From cori sandler to All panelists : we can also flail our arms to get you attention

12:27:48 From Lorretta Benning : what are R2O fluxes and Ro fluxes for someone who deont understand much of what you are saying?

12:28:42 From Joris-Jan Bos to All panelists : ::so in short lowering r2o?¿

12:28:57 From Monique Duclos to All panelists : Interesting !!

12:29:11 From Gary Caldwell : How accurate are the % compositions for your raw ceramic materials?

12:29:46 From Lorretta Benning : waht was the question again?

12:29:56 From cori sandler to All panelists : Can you suggest minimum component needed to create glazes?

12:30:08 From Sue McLeod : <https://suemcleodceramics.com/what-you-need-to-mix-ceramic-glazes/>

12:30:50 From Caren Willms to All panelists : my Q&A doesn't let me ask a question just "open, answered and dismissed"

12:31:28 From Kit Maloney to All panelists : Which supplier do you use/

12:31:28 From cori sandler to All panelists : great to share with my students. thanks

12:31:34 From Sofie Goethals : Perhaps because you are a panelist Caren

12:32:15 From Caren Willms to All panelists : ok

12:32:29 From Caren Willms to All panelists : thanks sofie

12:32:43 From Duffy Baum to All panelists : Sue can you read Lorretta Benning's question about R20 please?

12:34:32 From Melanie Corrigan to All panelists : What is a base?

12:35:21 From Sofie Goethals : R2O = alkaline earth fluxes = calcium oxide, magnesium oxide, barium oxide, strontium oxide and zink oxide. RO = alkali metal fluxes = sodium oxide, potassium oxide and lithium oxide. Fluxes are the components in the glaze that enhance the melt.

12:35:26 From Tolga Öçal to All panelists : Can you select a good starter cone 6 base glaze from glazy. And can you also elaborate on your thinking process. I am generally lost in glazy

12:35:26 From Judy Andrews to All panelists : A great base to start with is Hansons 5x20..can I say that?

12:36:23 From Sofie Goethals : and RO and R2O are the other way around :) Sorry RO = alkaline earth, RO is alkali metal

12:36:51 From Sue McLeod : glazy.org

12:36:56 From Sue McLeod : www.glazy.org

12:38:23 From Joris-Jan Bos to All panelists : ::my glaze doesn't dry quickly, when i apply, it has an spg of 148....

12:38:25 From Caren Willms to All panelists : having some crazing issues with clear glossy glazes. tried 3 different glossy recipes with Vashon white Paper Clay. Anyone have one that is working for you?

12:38:32 From cori sandler to All panelists : i recently gave them a donation - such a great resource for us all, if you can donate anything to glaze, you may want to consider it

12:38:50 From cori sandler to All panelists : even 10 - 20 bucks

12:38:56 From Lorretta Benning : im here

12:39:11 From Lorretta Benning : not on videpo

12:39:17 From Lorretta Benning : id rather not

12:39:23 From Donna Rutten to All panelists : sue can you advise how we can access the glaze recipes from cedar hill rec on glazy

12:39:42 From cori sandler to All panelists : there are arrows on eight side of the screen for the next page of attendees

12:39:47 From Duffy Baum to All panelists : Sofie you used the same letters for a different definition

12:40:02 From Lorretta Benning : I already have the clear made up

12:40:58 From Lorretta Benning : yes

12:41:24 From Sofie Goethals : Messing things up here, sorry for that. I'm probably tired. So, again. R2O = alkali metal flux. RO = alkaline earth flux. Alkali metal = lithium, potassium and sodium. Alkaline earth = calcium, magnesium, strontium, barium and zinc.

12:41:34 From Lorretta Benning : i keep my clear low

12:42:27 From Joris-Jan Bos to All panelists : maybe go from a liter...

12:42:42 From cori sandler to All panelists : isn't the ratio for water to dry chemicals, a little less than 80-90 percent water to them?

12:43:46 From Lorretta Benning : thank you!!!

12:43:47 From Sofie Goethals : Cori, that really depends on the glaze

12:43:52 From cori sandler to All panelists : ie, if i have 1000 gm of chemicals, i 'd add almost 1000ml of water but a bit less

12:44:17 From cori sandler to All panelists : sofie, you bet - just a guage

12:45:59 From cori sandler to All panelists : that was a great post sue

12:46:59 From Lillie Turner to All panelists : this is what I do to add colorants to wet glaze.. I usually add 80% water to start. I would measure the colorants based off the dry ingredient weight . Example 500 g wet glaze would have been 277 g dry ingredients plus 221 g water = 498 total weight.

12:47:03 From marionennis : a lot of recipes don't mention the SG ratio... How do you about it when you start testing a glaze. Which SG do you start with?

12:47:22 From Deb D to All panelists : Could you cover materials that fume in firing? Quick tips on material toxicity.

12:48:16 From Tolga Öçal to All panelists : Do you calculate SG for the base or do you do it after you add colorants

12:49:31 From marionennis to Sue McLeod(Privately) : a lot of recipes don't mention the SG ratio... How do you about it when you start testing a glaze. Which SG do you start with?

12:49:42 From Richard Davis to All panelists : Is 1.5 a good target for most glazes?

12:49:43 From Joris-Jan Bos to Sue McLeod(Privately) : ::do you use SPG also for slips....what would be a good number...?¿

12:49:53 From Kathleen Scott : I target 1.45 with a new recipe

12:50:14 From Sue McLeod to Lorretta Benning and all panelists : www.suemcleodceramics.com/sguide

12:50:18 From Richard Davis to All panelists : Is .5 a critical difference?

12:50:31 From Caren Willms to All panelists : yes!

12:52:25 From Naomi Charron to All panelists : remember to mark the sg on the tiles!!

12:53:05 From Kathleen Scott : The first time I tested SG on my glazes , my glazes happen to average 1.45. That was based on the finger coating test.

12:53:21 From Joan Roper to Deb D and all panelists : so the only time you defloccuate or flocculate is when the glaze SG has changed?

12:53:54 From Lorretta Benning : if your specific gravity doesn't help is that when u flocculate or dflocculate?

12:54:12 From Lorretta Benning : changing SG i mean

12:54:23 From Sofie Goethals : You wouldn't change the viscosity of the glaze before dipping? You would just make a series from high to low SG, without playing with darvan/epsom Salts?

12:55:05 From cori sandler to Lorretta Benning and all panelists : problem with syphoning water, is some items may be water soluble

12:55:35 From marionennis to Sue McLeod(Privately) : do you let the glaze sit over night after mixing before doing test tiles?

12:59:36 From Karen Kurtzrock to All panelists : For the reason you mentioned would you recommend not to refire work?

13:00:36 From Lorretta Benning : can you make your self bigger

13:01:37 From Lorretta Benning : how did you know to do that

13:01:42 From Julie- Jellybean Ceramics to Lorretta Benning and all panelists : If you click the view icon in the top left you can see Sue

13:01:49 From Lillie Turner to Lorretta Benning and all panelists : Loretta, you may need to change your screen view to " Speaker view" which is on the top right of the screen. it's a square with 9 small circles.

13:02:07 From Kathleen Scott to Karen Kurtzrock and all panelists : I will reglaze until I like it or wrecked it, Lol

13:03:28 From Don Draper to All panelists : I have a comment could I please be unmuted thank you, i'm under the Galaxy S20

- 13:03:35 From marionennis to Sue McLeod(Privately) : I noticed that sometimes when the glaze is too thin ,... flocculating it with Ep Salts does not change it well... other glazes do react better to Ep Salts... Any idea why?
- 13:04:28 From Heather Browning : R stands for an Alkaline element(flux in this case), O stands for Oxygen. R2O means it has two parts of that element and 1 part oxygen. RO has equal parts of each.
- 13:05:02 From cori sandler to Lorretta Benning and all panelists : sometimes, when i add epsom salt solution, it is too oily liquid, vs using vinegar which thickness it up
- 13:05:06 From cori sandler to Lorretta Benning and all panelists : can you talk to that
- 13:05:09 From cori sandler to Lorretta Benning and all panelists : do you know what i jean
- 13:09:12 From Matthew Little to All panelists : where do you get your Epsom salt? the only kind I find in stores has essential oils added to it like rosemary and so on...
- 13:09:55 From Joris-Jan Bos to All panelists : ::how about mixing air into the mix with a high speed mixer..
- 13:10:51 From Gary Caldwell : acetic acid
- 13:12:16 From Gary Caldwell : You are changing the pH of the solution.
- 13:14:45 From Lillie Turner to Sue McLeod(Privately) : Sue I have a glaze with high clay content that does not dry fast- what can I add to make the glaze dry faster? Darvan?
- 13:14:58 From Joris-Jan Bos to All panelists : ::anything on mocha....?;
- 13:15:40 From Leslie Tuchek to All panelists : Sue, how fast should my glaze dry on a test tile or a piece? can it dry too fast or is it bad if it takes 20 minutes or so on bisque 04?
- 13:16:02 From Julie- Jellybean Ceramics to Sue McLeod(Privately) : Thanks so much for doing this Sue. Looking forward to the next one.
- 13:16:23 From Joris-Jan Bos to All panelists : ::i hear people wife a leather hard piece to smooth it out real smooth...
- 13:16:38 From Melanie Corrigan to All panelists : Acetic acid helps to kill mildew, so perhaps that's the impetus to add it to throwing water and reclaimed mixtures.
- 13:16:43 From Joris-Jan Bos to All panelists : ::not wife = vinegar..
- 13:16:48 From Gary Caldwell : Darvan has a shelf of about two year.

13:17:11 From Gary Caldwell : shelf-life

13:20:42 From Richard Davis to All panelists : Gum Arabic

13:20:51 From Naomi Charron to Gary Caldwell and all panelists : i prefer distilled water for commercial glazes

13:20:52 From Lillie Turner : CMC gum can make a dipping glaze a brushable glaze

13:21:05 From Sofie Goethals : I have to go guys, Sue thanks a lot for the glaze talk. Everyone, stay safe and perhaps see you a next time! Bye!!

13:23:21 From Corine Adams : So to deflocculate, you use darvan?
And to flocculate, you use epsom salts?

13:23:47 From Patricia Esperanza Lopez : Dan can you share again the name of the website?

13:30:59 From cori sandler to All panelists : i have a GREAT CLEAR - not here with me cut you can send me an email and I'll get it to you

13:31:01 From Matthew Little to All panelists : the insight live will show you an estimated expansion

13:31:08 From Ann Peters to All panelists : Gotta go . . . but I loved this!

13:31:13 From Joris-Jan Bos to All panelists : ::my hansen 5 cx 20 give a blue sheen when applied thickly, what does that.....?¿

13:34:22 From Naomi Charron to Gary Caldwell and all panelists : thank you cory!

13:34:58 From Jodie Godwin to All panelists : What cone is Cori's clear glaze?

13:35:03 From Yvan Lessard : put the address on the text box...

13:35:48 From Heather Browning : once a glaze has crazed, can you repair that in another firing, or are you stuck with it?

13:36:16 From Melanie Corrigan to All panelists : Sue, what is your FB group? Is it open or paid?

13:37:13 From Matthew Little to All panelists : Tony Hanson recommends mixing in 10% of a gloss glaze to your matte glaze to help with cutlery marking

13:37:51 From Kit Maloney to All panelists : Melanie, the fb group is Understanding Glazes with Sue

13:37:57 From Heather Browning :
<https://www.facebook.com/groups/UnderstandingGlazes/>

13:38:08 From Melanie Corrigan to All panelists : Thanks Heather!

13:39:37 From Melanie Corrigan to All panelists : (And thanks, Kit!)

13:41:41 From Gary Caldwell : Check your tap water for Na first

13:44:23 From Melanie Corrigan to All panelists : Can I ask a non glaze question at the end?

13:46:55 From cori sandler to All panelists : Digital fire c6 dhsc for slow cooling cycle.

13:47:35 From Don Draper to All panelists :
https://digitalfire.com/4sight/firingschedule/plainsman_cone_6_slow_cool_reactive_glazes_firing_schedule_115.html

13:48:09 From Matthew Little : rude!

13:48:17 From Naomi Charron to Gary Caldwell and all panelists : ugh. mansplain!

13:48:18 From Sabdy Robinson to All panelists : nice studio Kit!

13:48:58 From cori sandler to All panelists : its no harder than cooking - understand how to change things up, sure that takes lots of knowledge, but... there is so much online re recipes. test make test

13:49:54 From Caren Willms to All panelists : is this the one? C6DHSC Firing Schedule
Plainsman Cone 6 Slow Cool (Reactive glazes)

13:50:42 From marionennis to All panelists : Thank you Sue! It was a great idea and Nice to meet everyone. Be well and safe out there

13:52:39 From Kit Maloney to All panelists : Thanks all!

13:52:41 From Gary Caldwell : What is mansplain?

13:53:11 From Caren Willms to All panelists : Thanks Sue and everyone. Really great. Look forward to the next one. Be well.

13:53:12 From Leslie Tucheck to All panelists : amaranth stoneware in ON has good chemical prices and ships 12lbs for \$15.00z a small mom & pop store so sometimes patience is needed.

13:54:11 From Naomi Charron to Gary Caldwell and all panelists : the sounding stone in winnipeg

13:54:36 From Trish Lansdell-Denholm to All panelists : HI.. I think Sanding Stone is in Manitoba... Calgary has Ceramics Canada and Plainsman in Edmonton

13:54:56 From Trish Lansdell-Denholm to All panelists : Plainsman pottery supply in Edmonton

13:55:19 From Paoletta De Filippis to All panelists : Thanks Sue. This was a great idea and lot of fun!

13:55:23 From Richard Davis to All panelists : Mansplain - is when a man takes a condescending tone to anyone regardless of age or gender

13:56:08 From Matthew Little : Thanks so much Sue!

13:56:14 From Melanie Corrigan to All panelists : Thanks Sue and everyone - this was really great!!

13:56:18 From Fiorenzo D'Arsiè to All panelists : Thanks Sue it's great what you are doing. Ciao

13:56:24 From Tolga Öçal to All panelists : Lovely time. :)

13:56:29 From Naomi Charron to Gary Caldwell and all panelists : thank you so much sue! no need to apologize!

13:56:38 From cori sandler to All panelists : thanks everyone. stay safe!

13:56:40 From Richard Davis to All panelists : Thank you it was GREAT !

13:56:45 From Jan Powley to All panelists : thanks everyone! enjoyed it! 😊

13:56:53 From Susanne Peglar to All panelists : Thankyou so much! I learnt a lot. It was fun.

13:56:58 From Deb Reilly to All panelists : thanks Sue, this has been a great first effort. good information!!

13:56:59 From Monique Duclos to All panelists : Big Thanks Sue !! Really enjoy ! :)

13:57:14 From Mary Lee to All panelists : Thank you I enjoyed my first visit on the computer.

13:57:24 From Caroline Egleston : Thank you, Sue! I agree... it's very helpful.. from Caroline in England

13:57:33 From Leslie Tuchek : thanks Sue

13:57:49 From Kathleen Scott : Thank you Sue!

13:57:58 From Cindy Shedd to All panelists : Thank you so much Sue for this and for all your generous sharing online. It's a great support!

13:58:14 From Mary Lee to All panelists : This has been a pleasant way to spend the afternoon. Thanks.

13:58:20 From Kevin Hutchinson : Thanks!

13:58:24 From Joyce Basye : SO WONDERFUL TO HAVE THIS AS A RESOURCE, I APPRECIATE EVERYONE'S COMMENTS AND ADDITIONS ... LOOKING FORWARD TO LEARNING FROM ALL INVOLVED...GREAT ADDITION THANKS SUE

13:58:24 From Isabelle Roy : Thank you!

13:58:25 From Yvan Lessard : tks Sue really nice to hear you!
